ABOUT US

Welcome to Countryside Barns! We are a family owned and operated business that was started in 2009. Our company is based upon strong values and strives to maintain a business reputation of honesty, integrity and trust. Every effort is made to not only earn your trust, but to also maintain your trust by “being as good as our word” and “treating our customers the way we would want to be treated.”

We believe that building structures of unmatched quality and providing the best customer service are the most important things we can do for you, our customer. We strive to achieve this by using top quality materials, caring craftsmanship, and personalized service. We also believe every building should be constructed as if we were building it for ourselves. Because we are a manufacturer selling directly to the public, we are able to oversee and manage the entire process from design, to manufacturing, to installation and delivery. This ensures that you, the customer, receive the best service possible.

Countryside Barns offers a full array of quality structures for any property—from storage sheds, garages, chicken coops, garden sheds, man caves, she sheds, private offices, cabins, hunting cabins, and even finished out cabins. We will gladly help you customize your building so that you have a quality structure to meet your specific needs; one that you and your family will enjoy for many years to come.

Find out more about us at www.countrysidebarns.com or stop by and meet one of our friendly, professional sales representatives. Thank you for considering Countryside Barns! We look forward to working with you!

CUSTOM BUILDINGS

PREPARING YOUR SITE & DELIVERY PROCESS

SITE PREPARATION

It is the customer's responsibility to obtain any/all necessary permits and follow zoning requirements. Countryside Barns recommends using a 4"-5" gravel base for your building. (see picture on right) **Note: Watch video on website**

The site where the building will be placed should be level and ready for the building prior to delivery.

DELIVERY

To offer you the best possible delivery service, we oversee and control the entire process—from scheduling the delivery date and time, to owning our own delivery equipment and employing our own professional delivery drivers. Using our state-of-the-art equipment, your new building will be carefully placed on your readied site by our delivery experts. We use a special machine, called the Mule, that minimizes the impact on your manicured lawn.

Countryside Barns is glad to offer FREE delivery and set-up of your building within 150 miles of our main office and manufacturing facility in Eureka, IL. Upon completion of your building, we will call you to schedule a delivery date and time.

STANDARD FREE DELIVERY AND SET-UP REQUIRES:

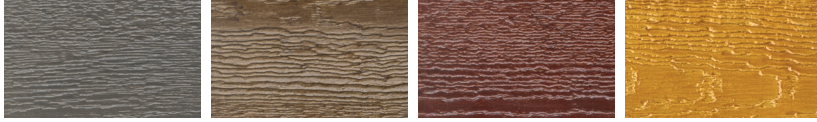

1. Ability to access your location.
2. Any openings we need to take your building through should be at least one foot wider than the building width.
3. A relatively level site for your building.

CONSTRUCTION DETAILS

ROOF SYSTEM

ALL roofs are built with trusses every 24" on center and 7/16" sheathing with Limited Lifetime warranty shingles or metal.

TRUSS PLATES

We use steel truss plates on all trusses and door frames.

LOFT AREAS

All lofted buildings have two loft areas – one on each end of the building with an open access area between the two lofts. Lofts are built with 2"x4" or 2"x6" loft joists and sheathed on top to make a nice loft floor.

FRAME CONSTRUCTION

Framing consists of 2"x4" studs every 16" on center.

DOUBLE TOP PLATES

ALL walls are constructed with double top plates that interlock with adjacent walls. (Loft joists interlock on lofted style buildings.)

DOORS

Our 2"x4" reinforced doors are designed to keep out rain and rodents. Key locked for your protection.

TREATED SKIDS

We use 4"x6" treated skids that are notched to securely hold the floor joists.

FLOOR CONSTRUCTION

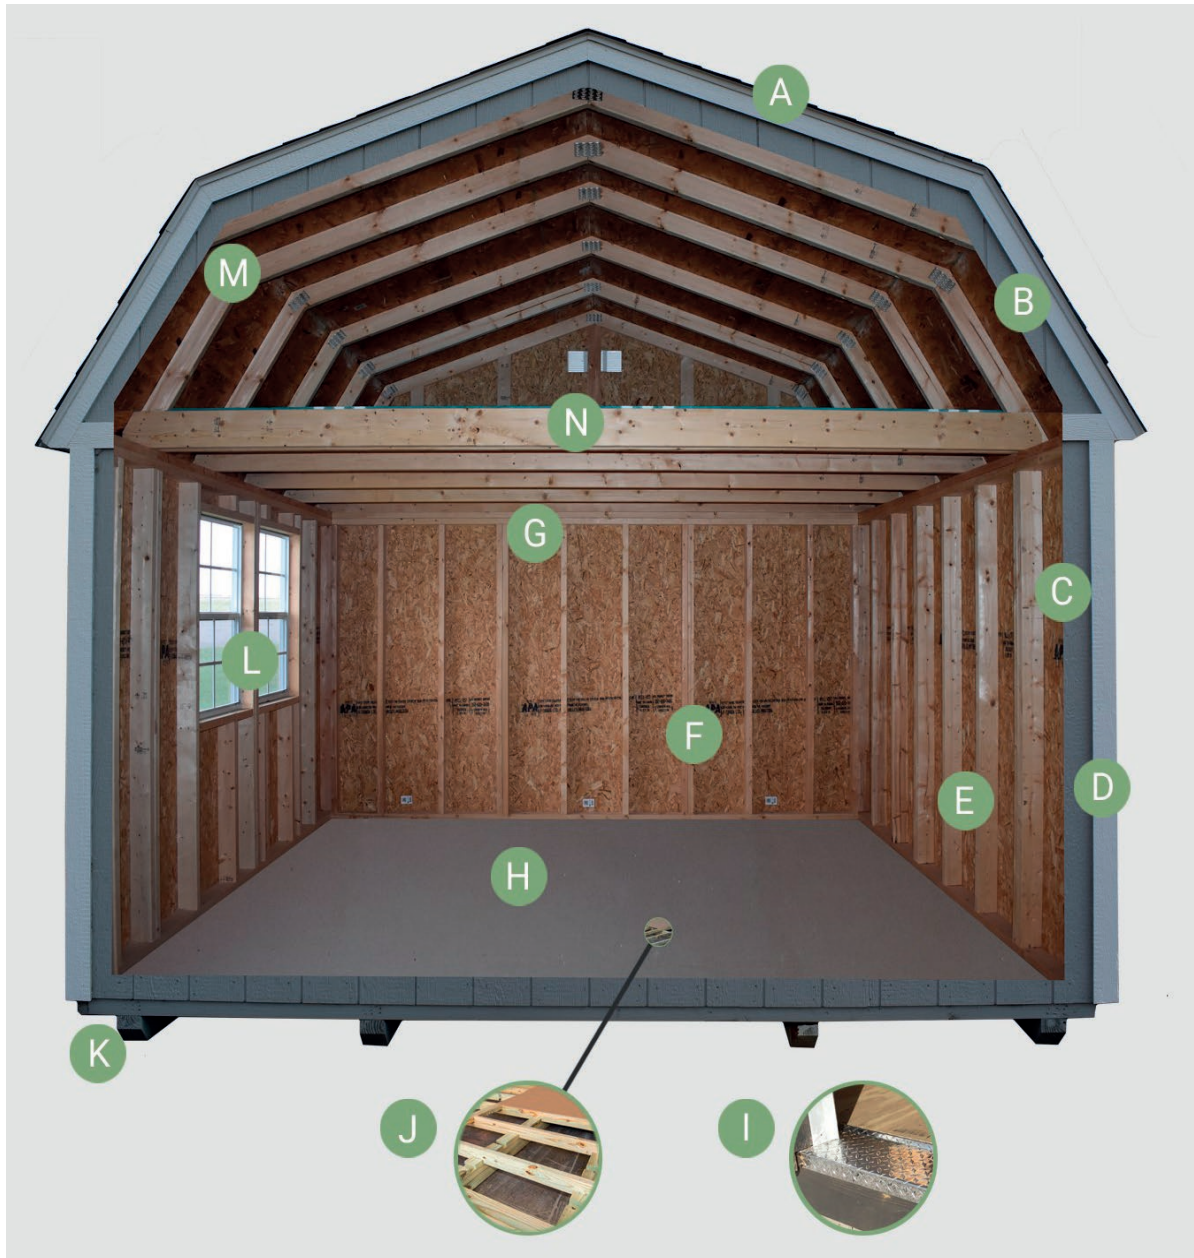

With our 4"x6" skids, treated 2"x4" or 2"x6" floor joists, and 5/8" or 3/4" LP Prostruct flooring, we have one of the strongest floor systems in the industry. Our floors should never rot out!

DIAMOND PLATE THRESHOLD

All buildings have a steel diamond plate threshold to protect the entrance and keep moisture out.

UNDERSTANDING THE DIFFERENCE

UNDERSTAND THE DIFFERENCE

- A** Choice of metal or shingle roof
- B** Exposed nails are ring-shanked and galvanized for rust prevention
- C** LP SmartSide siding (5/50-year limited warranty) on all painted and urethane buildings.
- D** Vinyl and metal siding come with a limited lifetime warranty
- E** 2x4 studs - 16" on center
- F** Double studs at every siding seam
- G** Double top plate on ALL walls
- H** 5/8" treated tongue & groove LP Prostruct Flooring
- I** Diamond Plate threshold on all door openings
- J** 2x4 or 2x6 pressure treated floor joists set 16" on center - Heavy duty option available
- K** 4x6 treated skids notched so that floor joists are locked into the skids
- L** Working windows that lock - include screens
- M** Steel gusset plates on trusses
- N** Premium quality prime grade lumber

LP[®] OUTDOOR BUILDING SOLUTIONS

BUILDING PRODUCTS

Treated to the Core with SmartGuard[®]

Every LP[®] SmartGuard[®] product is manufactured with our proprietary SmartGuard process to help resist damage from harsh environments, fungal decay and termites. Learn more about the four key components of protection by visiting www.LPShed.com.

Tested To The Extreme In Hilo, Hawaii Since 1996

LP SmartSide products have proven their toughness after 20 years of being subjected to the harsh jungle environment.

Intense Humidity

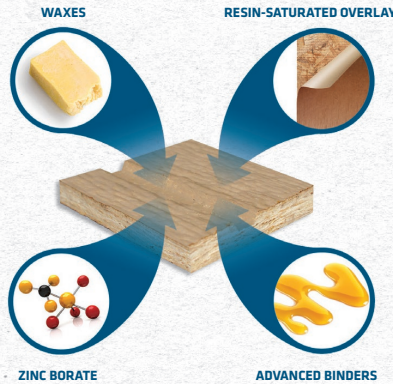

170" Annual Rainfall

High Formosan Termite Population

Ideal Conditions for Fungal Decay

A Warranty That Protects Your Peace of Mind
